Digital Image processing

Open Lab-1

25 Apr 2017

Task-1: Apply image processing steps to blend all symbols with background. You should get output as shown in figure-1 (b)

Figure-1: (a) original Image; (b) Required output image

Task-2: Following image contains a periodic noise. Use your image processing concepts to remove this noise form image and final output image should be as shown in figure-2 (b)

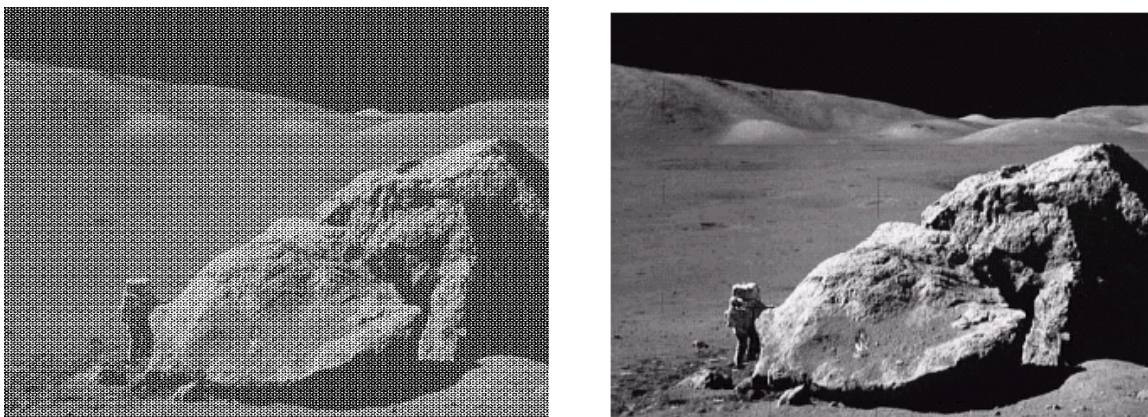

Figure-2: (a) original Noisy Image; (b) Restored image after noise removal
